ATTEMPTED THEFT — PREVENTED

Steel pipe yard, Mundka Industrial Area, Delhi · 23 May 2026 · 04:16 – 04:55 IST

REFERENCE

SPS-IR-2026-0523-014

CLIENT

Withheld (specimen)

PLAN

Monitored site — 6 cameras, siren, voice

CAMERA

S3MC3 · Yard — pipe stack

OPERATOR / SUPERVISOR

OP-07 (night shift) · SUP-02

INCIDENT TYPE

Attempted theft — prevented

OUTCOME

No loss. Intruders left after voice warning; perimeter verified by patrol.

TIMELINE

04:16:52	Detection	Motion in zone “Yard — pipe stack”, camera S3MC3. Alert raised to control room with live feed.
04:16:55	Verified	Operator on channel. Two persons confirmed inside the yard at the pipe stacks; not staff, not a scheduled delivery.
04:17:03	Siren	On-site siren triggered from the control room.
04:17:10	Voice warning	Operator addressed the intruders through the yard speaker (in Hindi): “You are under surveillance. Leave the yard immediately. The police are being informed.”
04:17:18	Evidence	Still 1 captured (below). Clip recording marked from 04:16:40.
04:17:41	Departure	Both persons left over the rear boundary wall. No material carried.
04:18:05	Client informed	Site owner called on the registered number; informed that the site was clear and a patrol was on its way.
04:22:10	Patrol dispatched	Nearest patrol unit dispatched to check the perimeter and the rear wall.
04:41:30	Patrol on site	Perimeter walked. Rear wall scuffed at the north-east corner; no cut fencing, no stock displaced.
04:55:00	Site clear	Monitoring returned to normal. Clip exported and attached.
09:30:00	Report sent	This report and the clip sent to the client by WhatsApp and email.

SPECIMEN REPORT — the footage is real and published on the SPS YouTube channel; the client is anonymised and the timings, reference and operator IDs are illustrative of the format.

EVIDENCE

Still 1 — 04:17:18, camera S3MC3. Two persons at the pipe stack, boxed by the detection zone.

Still 2 — 04:16:55, control room. Operator on channel, live feed verified.

Video clip (1 min 12 s, 04:16:40 – 04:17:52):

FINDINGS

- Entry was over the north-east rear wall, the one side of the yard without lighting. The camera covered it; the intruders evidently assumed it did not.
- The voice warning ended the attempt within 30 seconds of the first movement. No physical intervention was needed.
- Nothing was taken. The pipe stacks nearest the wall were checked by the patrol against the previous evening's count.

ACTIONS

- | | |
|--------|---|
| SPS | Detection zone extended 2 m along the rear wall; sensitivity re-tuned for that camera. Done 23 May. |
| SPS | Voice-warning script for this site updated to name the pipe stack area specifically. |
| CLIENT | Recommended: one floodlight on the north-east corner (any 50 W LED on the existing supply). Reduces repeat attempts more than any equipment we can add. |
| CLIENT | Optional: file a police complaint with the attached clip. We can provide a stamped copy of this report for it. |

SIGN-OFF

Prepared by operator OP-07 (night shift). Reviewed by supervisor SUP-02. Sent 23 May 2026, 09:30 IST.

Every incident on a monitored SPS site — including false alarms — produces a report in this format the same day, with the clip attached. Keep it with your insurance file; it is what an insurer asks for and what a police complaint needs.
